Senior Software Engineer — Full Stack

Full-Time · Hybrid · Bangalore / Remote · 8–14 LPA · 3–6 Years Experience

About the Role

We are looking for a Senior Software Engineer with strong full-stack expertise to join our growing product team. You will design, build, and maintain high-performance web applications using React and Node.js. You will collaborate closely with product managers, designers, and backend engineers to deliver exceptional user experiences. This is a high-impact role where your code will be used by thousands of users daily.

Key Responsibilities

- Design and develop scalable, high-performance React and Node.js applications
- Lead technical architecture discussions and code reviews
- Collaborate with cross-functional teams to define, design, and ship new features
- Write clean, maintainable, and well-tested code with >80% unit test coverage
- Mentor junior developers and drive engineering best practices
- Integrate RESTful APIs and third-party services including payment gateways
- Optimize application performance, reduce load times, and improve scalability
- Participate in Agile ceremonies — sprint planning, standups, retrospectives
- Troubleshoot and debug production issues with urgency and ownership

Required Skills & Technologies

- React.js / Next.js (3+ years)
- Node.js / Express.js / TypeScript
- MySQL / PostgreSQL — advanced querying, indexing, optimization
- REST APIs & GraphQL design and integration
- Git, CI/CD pipelines (GitHub Actions, Jenkins)
- Docker / Kubernetes basics
- AWS services — S3, EC2, RDS, Lambda
- Redis for caching and session management
- HTML5, CSS3, Tailwind CSS
- Jest, Mocha — unit and integration testing

Qualifications & Experience

- B.E. / B.Tech / MCA in Computer Science or related field
- 3 to 6 years of professional full-stack development experience
- Prior experience in a product-based company is preferred
- Strong understanding of data structures, algorithms, and system design
- Excellent problem-solving and communication skills

Good to Have

Experience with AI/ML integration (OpenAI, Anthropic APIs)

Knowledge of micro-services architecture

Open-source contributions or personal projects on GitHub

Familiarity with Agile / Scrum methodology

Compensation & Benefits

Salary: 8 LPA – 14 LPA (based on experience)

Annual performance bonus up to 15%

Flexible work-from-home — 3 days office, 2 days remote (Hybrid)

Health insurance: Self + Spouse + 2 Children covered

Learning budget: 125,000/year for courses and conferences

25 days paid leave + 10 national holidays

ESOP options for senior roles

Location & Work Details

Location: Bangalore, Karnataka (HSR Layout). Work Mode: Hybrid — 3 days in office, 2 days remote. Work Hours: 10 AM – 7 PM IST (flexible). Interview Process: HR Screening !' Technical Round 1 !' Technical Round 2 !' Culture Fit !' Offer.
