

Software Engineer - Job Description

Company: Mass Call Net Pvt. Ltd.

Location: Noida, Uttar Pradesh

Department: Technology & Product Development

Employment Type: Full-Time

About Mass Call Net

Mass Call Net Pvt. Ltd. is a fast-growing organization focused on technology-driven business solutions, customer engagement platforms, analytics, recruitment systems, and enterprise applications. We are seeking a talented Software Engineer to design, develop, and maintain scalable applications.

Key Responsibilities

- Design, develop, test, and maintain web applications and APIs.
- Collaborate with business teams to gather requirements.
- Write clean, maintainable, and efficient code.
- Optimize application performance and database queries.
- Troubleshoot and resolve software defects.
- Participate in code reviews and technical discussions.
- Ensure security, scalability, and reliability of applications.
- Maintain technical documentation and deployment processes.

Required Skills

- Strong knowledge of Python, JavaScript, or Java.
- Experience with React.js, Node.js, FastAPI, or similar frameworks.
- Good understanding of MySQL, SQL Server, or PostgreSQL.
- Knowledge of REST APIs and system integrations.
- Familiarity with Git and version control systems.
- Understanding of cloud platforms and deployment processes.
- Strong problem-solving and analytical skills.

Preferred Qualifications

- Bachelor's degree in Computer Science, IT, or related field.
- 1–5 years of software development experience.
- Experience with Docker, CI/CD, and cloud services is a plus.
- Knowledge of HRMS, RMS, CRM, or enterprise applications is advantageous.

What We Offer

- Competitive salary and performance incentives.
- Career growth opportunities.
- Learning and development programs.
- Collaborative and innovative work environment.
