PROFESSIONAL SUMMARY

Results-driven Data Analyst with 1.6 years of hands-on experience in Business Intelligence, Power BI dashboard development, SQL Server-based data analysis, and Python-driven reporting automation. Delivered end-to-end analytics solutions across HR, Sales, and E-Commerce domains, including HRMS, Biometric Management System, Agent Portal, and Interview Portal. Proficient in DAX modeling, ETL pipeline development, Advanced Excel, and Looker Studio. Experienced in transforming complex, multi-source data into actionable KPI dashboards that drive strategic decision-making. Familiar with AWS cloud fundamentals (S3, EC2, RDS) and full-stack web technologies (ReactJS, Node.js). Seeking a Data Analyst, Power BI Developer, or BI Analyst role where data expertise can deliver measurable business impact.

TECHNICAL SKILLS

Business Intelligence & Visualization: Power BI Desktop, Power BI Service, DAX, Looker Studio, KPI Reporting, Dashboard Development, Data Visualization, Interactive Reports, Scheduled Refresh, Drill-Through Reports

Databases & Querying: MS SQL Server, T-SQL, Stored Procedures, Functions, Joins, Subqueries, Data Modeling, Data Warehousing, Database Schema Design

Programming & Automation: Python (Pandas, NumPy), VBA, Google Apps Script, Reporting Automation, Process Automation, ETL Development, Scripting

Data Analytics: Power bi(Dax, Data Modelling ,Power Query),Ms sql Server ,MySQL,Advanced Excel (Pivot Tables, Power Query, VLOOKUP, INDEX-MATCH), Google Sheets, Data Cleaning, Data Transformation, Data Validation, Trend Analysis, Variance Analysis, Performance Analysis, Business Reporting

Cloud Technologies: AWS S3, AWS EC2, AWS RDS (Fundamentals), Cloud Data Integration

Web Technologies: ReactJS, Node.js, HTML, CSS

PROFESSIONAL EXPERIENCE

DATA ANALYST — Mascallnet Private Limited, New Delhi | Aug 2025 – Present

Architected and deployed [8+] interactive Power BI dashboards for HR, Sales, and Operations teams, enabling real-time KPI tracking and performance analysis that reduced reporting turnaround time by [40%]

Engineered Python (Pandas, NumPy) ETL automation pipelines for data extraction, transformation, and loading from [5+] disparate data sources, eliminating [4+] hours of manual data processing monthly

Designed and developed 4 full-stack business applications (HRMS, Biometric Management System, Agent Portal, Interview Portal) using ReactJS, Node.js, and SQL Server, digitizing operations for [400+] end users

Constructed complex T-SQL queries, stored procedures, and multi-table joins against MS SQL Server databases to power dashboards with validated, accurate data

Built advanced Excel reporting solutions using Pivot Tables, Power Query, and INDEX-MATCH, integrating [5+] data sources for consolidated business reporting and stakeholder management

Authored Google Apps Script and VBA macros to automate repetitive reporting workflows, improving team productivity by [80%]

Developed DAX measures and calculated columns in Power BI incorporating time intelligence, ranking, and variance analysis for business intelligence insights delivered to senior stakeholders

Enforced data governance standards through systematic data validation and data cleaning routines, maintaining [95%+] data accuracy across all pipelines

MIS EXECUTIVE — Silaris Information Technology, Delhi | Dec 2024 – Jul 2025

- Designed and maintained [10+] Power BI dashboards for cross-functional performance tracking, KPI reporting, and variance analysis, reviewed weekly by senior management
- Automated data consolidation from Excel, MS SQL Server, and SharePoint using Power Query and Python scripts, reducing data preparation effort by [40%] and eliminating manual errors
- Developed data models, DAX measures, and calculated KPIs in Power BI to deliver actionable business intelligence insights for trend analysis and performance analysis
- Managed scheduled report refresh cycles via Power BI Service, ensuring [10+] reports remained real-time and consistently available to stakeholders
- Executed trend analysis and variance analysis on monthly business performance datasets, surfacing insights that directly informed management decisions
- Collaborated with cross-functional stakeholders to gather reporting requirements and translate them into scalable BI dashboards and data governance frameworks
- Maintained data quality through end-to-end data validation, data cleaning, and transformation workflows across [5] production datasets

KEY PROJECTS

1. HRMS – Human Resource Management System

Tech Stack: *ReactJS, Node.js, MS SQL Server, Python, Power BI*

- Designed relational database schema in SQL Server for employee, payroll, attendance, and leave management modules serving 1000+ employees
- Developed RESTful Node.js APIs and React frontend for end-to-end HR workflow digitization, replacing manual HR processes
- Built Power BI HR analytics dashboards tracking headcount, attrition rate, and performance KPIs using advanced DAX measures
- Automated payroll calculations via Python scripts, reducing processing time by [65%]

Impact: Reduced HR operational effort by [50%]; delivered real-time HR analytics for data-driven workforce decisions

2. Biometric Management System

Tech Stack: *Python, MS SQL Server, Power BI, Advanced Excel*

- Built Python ETL pipelines to ingest and process biometric device data into SQL Server, replacing manual attendance logging for [1000+] employees
- Developed T-SQL stored procedures for attendance aggregation and compliance reporting
- Created automated Power BI attendance dashboards with daily scheduled refresh via Power BI Service

Impact: Eliminated manual attendance tracking; improved data accuracy by [90%]

3. Agent Portal

Tech Stack: *ReactJS, Node.js, MS SQL Server, Power BI, Python*

- Developed a centralized portal for real-time agent KPI monitoring, performance analysis, and operational reporting for [X] managers
- Automated weekly performance reports using Python and Google Apps Script, reducing reporting cycle from [X days] to [X hours]

Impact: Improved management visibility into agent performance; cut reporting effort by [90%]

4. Interview Portal

Tech Stack: *ReactJS, Node.js, MS SQL Server, Google Apps Script*

- Built end-to-end candidate tracking, interview scheduling, and feedback collection system for [100+] active recruiters
- Implemented SQL-based recruitment pipeline analytics dashboard for hiring funnel visibility
- Automated interview scheduling notifications via Google Apps Script

Impact: Streamlined hiring workflow, reducing administrative overhead by [80%]

5. HR Analytics Dashboard

Tech Stack: *Power BI, DAX, MS SQL Server, Power Query*

Engineered DAX measures for attrition rate, headcount trends, cost-per-hire, and performance KPIs with time intelligence (YoY, MoM)

Designed drill-through Power BI reports with dynamic slicers for department-level and employee-level analysis

Impact: Reduced time-to-insight for HR team from [X days] to real-time

6. Sales Analytics Dashboard

Tech Stack: Power BI, DAX, SQL Server, Advanced Excel

Built real-time sales performance dashboard tracking revenue, targets, regional performance, and product mix for sales managers

Implemented YoY, QoQ, and MoM time intelligence DAX functions for variance analysis and trend forecasting

Impact: Upgraded reporting frequency from weekly to real-time; improved sales strategy decisions

7. E-Commerce Analytics Dashboard

Tech Stack: Power BI, Python (Pandas), SQL Server, Looker Studio

Aggregated multi-source e-commerce data using Python (Pandas) ETL and Power Query for product, order, and customer analytics

Delivered KPI dashboards covering [5+] product categories, customer segmentation, and revenue trends for executive reporting

Impact: Enabled data-driven product decisions; improved reporting efficiency by [75%]

EDUCATION

B.Tech – Computer Science & Engineering — Dr. Abdul Kalam Technical University, Lucknow | [Year of Passing]

Diploma – Computer Science & Engineering — BTEUP Board, Uttar Pradesh | [Year of Passing]

DATA ANALYST TRAINING

Maati Academy, New Delhi | Jun 2024 – Dec 2024

Completed hands-on training in SQL Server, Advanced Excel, Google Sheets, and Power BI on real-world industry datasets

Mastered T-SQL queries including joins, subqueries, stored procedures, and functions for data extraction and analysis

Developed DAX measures, calculated columns, and KPI dashboards for business intelligence reporting

Performed data cleaning, data transformation, and data validation using Excel and Google Sheets

CERTIFICATIONS

Microsoft Power BI Data Analyst Associate – PL-300 (Pursuing / 2026)

Microsoft Azure Data Fundamentals – DP-900 (Recommended)

AWS Cloud Practitioner – CLF-C02 (Recommended)

ADDITIONAL INFORMATION

Languages: English (Professional), Hindi (Native)

Availability: Immediate Joining | Work Mode: Open to Remote, Hybrid, and On-Site

Targeting: Data Analyst | Power BI Developer | BI Analyst | MIS Analyst | Reporting Analyst | AWS Data Analyst
